

Pacific Avenue Overpass

The Pacific Avenue overpass is a gateway to downtown Everett and a key link to the new Everett transportation station. The overpass is a grade-separated crossing over the BNSF railroad tracks on Pacific Avenue. A ramp from the overpass leads down to the adjacent Everett Station, which is the city's new transportation center for trains and buses. The overpass provides a safer crossing for vehicles and pedestrians in addition to improving the safety and reliability of freight and passenger trains.

Mode

Commuter rail, bus
